9.00 Registration and Welcome Coffee

9.30 Greetings and Introduction

Gabriele SCICOLONE, OICE President

Antonio VETTESE, OICE Board Member responsible for Innovation, Digitalization, Industry 4.0 and Forum Coordinator

1st Session: Digitalization on Real Estate Asset Management

9.40 Russ MANNING - Penn State University
PhD, LeedAP, CEFP, VDC Engineer

10.20 Davide ALBERTINI PETRONI Risanamento SpA - Assoimmobiliare
Managing Director Risanamento SpA

10.50 Coffee Break

2nd Session: BIM Evolution within the Infrastructure framework

11.20 Ross DENTEN- Crossrail
Asset Information and Configuration Manager
Enabling Quality Asset Information to Support the Crossrail Smart Railway

12.00 ITALFERR Italian National Railway Engineering Company
First White Paper on BIM: "Innovate in order to design the Future"
Carlo CARGANICO, CEO & General Manager
From concept to implementation

Andrea NARDINOCCHI, Technical Director
BIM's potential over the next 10 years

Daniela APREA, BIM Manager
BIM Manager role in Italferr

Federica SANTINI, Director for Strategic Innovation and IT
Innovation as a strategic business leverage

Rosaria FERRO, Construction Manager
BIM Oriented Construction Site Management

Fabrizio RANUCCI, Procurement and Control Manager
Procurement process

12.50 Helle GAUB - University hospitals of Roskilde and Køge - Copenhagen
Managing project Director
Gains and benefits from using new technologies in planning and building a hospital

13.30 Lunch Break

3rd Session: Evolution of Software Houses' Tools

14.30 Flavio ANDREATTA - Allplan
Tools to support a digital and integrated process

Ilaria LAGAZIO - Autodesk
Autodesk BIM 360: sharing, managing and coordinating the project and the BIM site efficiently

Jakub WACHOCKI - Bentley
Connected Data Environment for Constructions and Asset Management

Salvatore SICURELLA - Graphisoft
Pervasive Design

4th Session: Italian Engineering Companies Case Histories

16.10 Massimo CAPASSO - Lotti Ingegneria
Rehabilitation of the RN1 national road in Djibouti

Davide CLAUSER e Joel POLIN - Net engineering
BIM methodology in the SFMR infrastructure operations program

Barbara FRASCARI - Politecnica
BEP for bidding in design tenders

Luigi REGONDI - Pro Iter
Ventimiglia new tourist port Project

17.10 Lorenzo ORSENIGO - ICMQ, CEO
BIM process management certification

17.20 Maurizio BOI - OICE, Vice President
International Engineering "Future trends"

17.30 Question Time and Conclusions

January 2019 is the outset for compulsory BIM technology in Italy. Initially applied to public projects exceeding 100 million € it will progressively be extended to all public tendering within 2025.

This road map will engender **disrupting effects** both on the demand and on the supply side of the industry. The Third edition of the International OICE BIM Forum has the ambition to disseminate the knowledge necessary to fulfil this requirement which constitutes a key factor for clients, designers, contractors and owners involved in the real estate and infrastructure sectors.

The Forum will provide an **overview on Italian and international experiences** related to the electronic tools application. It **covers design, construction, ownership and maintenance of building and infrastructure facilities**. Its main purpose is to highlight the effects connected to the implementation of the most innovative digital tools within the **information and project management** and assess their impact.

Italferr - the Italian National Railway Engineering Company - will present the First White Book on BIM - **"Innovate in order to design the Future"**, a report on the achievements and the future trends of technical innovation within the engineering industry.

The exchange of views and experiences between the *authoring* companies - permanent contributors to OICE's BIM Forums - and engineering companies will be paramount and enable to draw a balance and provide an overview on the industry's future trends.
